二、Who We Are Looking For?

- Final-year students in 2025/2026, holding a Bachelor/Master degree major in Computer Science, Engineering related
- Strong academic record and solid professional knowledge
- Desire for self-development and continuous learning
- Ability to thrive in a dynamic, fast-changing environment
- Passionate, results-oriented individuals
- Passionate about the Social Internet Industry and eager to take on new challenges
- Willingness to work in Kuala Lumpur
- The excellent communication in written and spoken English is an added advantage

三、What Position We Open

1. Position: Backend Engineer

As a Backend Engineer, you are the architect of our digital world, building the scalable, resilient, and high-performance infrastructure that powers our social universe.

Key Responsibilities:

- Lead technical solution design and core coding based on product requirements to efficiently develop and maintain backend products.
- As a key technical member, solve complex technical challenges in projects and ensure system stability, high reliability, and security.
- Continuously optimize the system architecture to support rapid business iteration and user growth.

Requirements:

- Bachelor's degree or above in Computer Science or a related field, with a solid foundation in data structures and algorithms.
- Proficient in the Go language and the Gin framework.
- Familiar with the Linux OS, and skilled in using Redis, MySQL, and relational database design.
- A strong commitment to code quality and good coding practices.
- Experience with social networking or audio/video projects is a plus.

As an Android Engineer, you will craft the beautiful, intuitive, and high-performance mobile experiences that our users touch, feel, and love every day.

2. Position: Software Engineer(Android)

As an Android Engineer, you will craft the beautiful, intuitive, and high-performance mobile experiences that our users touch, feel, and love every day.

Key Responsibilities:

- Take charge of feature development and iteration for our core business lines on Android, delivering high-quality code with high efficiency.
- Deeply engage in app product requirement discussions, collaborating closely with product managers and designers to polish the user experience.
- Proactively communicate and collaborate with various teams to drive problem resolution and ensure smooth project delivery.

Requirements:

- Bachelor's degree or above in Computer Science or a related field, with a solid foundation in Java or Kotlin.
- In-depth understanding of Android development, including but not limited to: proficiency in the four major components, mastery of custom views, understanding of framework principles, and expertise in performance optimization.
- Strong grasp of object-oriented design, common design patterns, SQL databases, and common algorithms.
- Familiar with threading and concurrency, with a strong awareness of quality, security, and automation.
- High sense of responsibility, strong teamwork spirit, and a fast learning ability.

3. Position: Software Engineer(iOS)

As an iOS Engineer, you will bring our social experiences to life on the Apple ecosystem, focusing on elegant design, fluid performance, and seamless integration.

Key Responsibilities:

- Take charge of feature development and iteration for our core business lines on iOS, delivering high-quality code with high efficiency.
- Deeply engage in app product requirement discussions, collaborating closely with product managers and designers to polish the user experience.
- Proactively communicate and collaborate with various teams to drive problem resolution and ensure smooth project delivery.

Requirements:

- Bachelor's degree or above in Computer Science or a related field.
- Proficient in Swift and Objective-C, with strong skills in UI components, networking, multithreading, and local data storage.
- Familiar with common architectures like MVP/MVVM and component-based practices.
- Deep understanding of performance tuning and online issue diagnosis, with the ability to quickly resolve crashes, freezes, and memory issues.
- Capable of independently solving technical challenges and familiar with Apple's review process.

4. Position: Test Engineer

As a Test Engineer, you are the ultimate guardian of our user experience. You ensure quality not just by finding bugs, but by building a culture and infrastructure of automated, intelligent testing.

Key Responsibilities:

- Independently lead project testing for core business lines, including designing test strategies and creating/executing test cases.
- Perform defect tracking and software quality analysis, continuously improving the testing process to ensure delivery quality.
- Communicate effectively with product and development teams to proactively drive the resolution of root-cause issues.

Requirements:

- Bachelor's degree or above in Computer Science or a related field; proficient in at least one programming language and comfortable with databases.
- Familiar with software testing theories and methodologies, with extensive experience in writing test cases and using tools like ADB and Monkey.
- Strong testing mindset and process understanding, capable of independently conducting high-quality testing.
- Passionate about testing, with excellent communication, problem-solving skills, and a strong sense of responsibility.

5. Position: Software Engineer (H5)

Key Responsibilities:

- Take ownership of feature design, development, and performance optimization for our core H5 products (social and gaming).
- Collaborate closely with product, design, and backend teams to create exceptionally smooth and creative user experiences.
- Explore and apply cutting-edge web technologies to break through H5 performance barriers, achieving native-like interactive effects.

Requirements:

- Bachelor's degree or above in Computer Science or a related field.
- Proficient in HTML5, CSS3, and JavaScript/TypeScript with a strong frontend foundation.
- Familiar with at least one modern frontend framework (e.g., Vue, React).
- Experience with an H5 game engine or rendering library (e.g., Cocos, Laya, PixiJS, Three.js) is a major plus.
- Deep understanding of and practical experience in web performance optimization.
- Passionate about technology, with excellent learning abilities and a strong team spirit.

四、What We Provide

- An industry-competitive salary package and an annual performance bonus
- Comprehensive Benefits Package to make sure your Work-Life Balance:
 - Comprehensive medical insurance and annual health screening
 - Flexible benefits plan/allowances (e.g., transportation, communication).
 - Leave Entitlements (Annual leave, public holidays etc.)
- Well-defined career development opportunities: Continuous 1-to-1 training and personal development programs etc
- An international team culture built on passion, drive and collaboration, encouraging innovation and idea-sharing
- Dynamic workplace with exciting projects and daily challenges
